evidence standard

Aditya Singh · Senior Manager, Global Operations and Business Technology

Every deck states its own evidence boundary on slide 3. Vendor and platform names are removed throughout.

Organised by account — delivered engagements above, solution and analysis below

DELIVERED — SIXTEEN INSTITUTIONS

HDFC Bank	Abu Dhabi Islamic Bank	Arab Bank	Kotak Mahindra Life	US credit unions · 12	Cross-account
01 Six journeys, four objectives 02 Two journeys, opposite risk 03 Cross-entity by design	14 Eight programmes, three years 15 Parallel approvals incl. Sharia 16 Early warning without the model	17 One corporate spine, six countries 18 From dashboards to decisions	12 Risk-based policy revival 13 Case visibility, five systems	25 The deployment factory 26 The integration tax 27 Six 360s and an action centre 28 Card servicing, three processors 29 Member banding and value	19 Group exposure is the hard problem 30 Notes from 38 programmes

SOLUTION, PRESALES AND ANALYSIS — NINE FURTHER INSTITUTIONS

State Bank of India	Axis Max Life	Maybank	Punjab National Bank	Bank Danamon	ASEAN · 3 banks
04 Operating CRM at 300,000 users 05 Reading an enterprise AI RFP 06 Seventy-five use cases, three years	07 Displacing the incumbent 08 Configurability as architecture 09 Five blockers and a deal	20 Nine architectures, two finalists 21 One architecture, three regulators 22 What a technical panel asks	10 Two clocks, one engine 11 The RM's day, rebuilt	23 Six thousand call types to 526	24 Three banks, three entry points

HOW TO USE IT

Thirty decks is a library, not a pitch — five per conversation, chosen by what the role is actually assessing

Enterprise AI and value strategy 05 Reading an RFP like an evaluator 06 Seventy-five use cases in three years 20 Nine architectures, two finalists 10 Two clocks, one engine 30 Notes from 38 programmes	Transformation and programme leadership 14 Eight programmes, three years 17 One corporate spine, six countries 25 The deployment factory 01 Six journeys, four objectives 30 Notes from 38 programmes	Architecture and platform 04 Operating CRM at 300,000 users 08 Configurability as architecture 21 One architecture, three regulators 19 Group exposure 26 The integration tax	Commercial and deal 09 Five blockers and a deal 07 Displacing the incumbent 05 Reading an RFP like an evaluator 20 Nine architectures, two finalists 22 What a technical panel asks

HOW TO READ THE NUMBERS — THE SAME CONVENTION IN EVERY DECK

Publicly reported Institution scale and outcomes published by the bank, the regulator or the vendor. Attributed, never independently audited.	Delivery record Scope, systems and role from my own engagement record. Verifiable through references.	Modelled Curves, ratios and effort figures built to make a structural argument. Directional, labelled on the slide, replace with actuals.	Reconstructed Design detail rebuilt to illustrate an approach where the original artefacts are not mine to reproduce. Flagged in five decks.
---	---	---	--

Nothing is upgraded by aggregation. A modelled figure quoted in the capstone is still a modelled figure, and every deck names its own sources in the footer of every slide.
